

Valve Accessories & Controls. www.blx.se

For dependable products and reliable service, the choice is simple.

A solid, simply designed positioner, with high quality construction is just the start of the VAC-LLC, and BLX-SE story. This newly formed partnership, developed to design and manufacture (BLX) and market (VAC) a new line of valve accessories from an independent source, will focus as much on service and support as the product. Our line of pneumatic and electropneumatic positioners and switches is loaded with features and benefits. Our actuators are under development with several sizes in production. A quality company should be a lot more than a quality product. Answering the phone, returning phone calls, and answering e-mails have become a rarity in today's world.

We want to respond to your needs—product, service, and personal. Sounds simple—we plan to keep it that way!
